Projects

Multi-User Task Manager *(In Progress)*

- Designed and implemented a multi-user task management web application with secure authentication, session handling, and user-scoped data isolation
- Designed RESTful CRUD endpoints for task creation, updates, and deletion with persistent storage using Flask-SQLAlchemy
- Implemented password hashing and authentication workflows using Werkzeug, enforcing secure credential storage and access control
- Built responsive frontend with HTML, CSS, and Vanilla JavaScript for dynamic task management

Let's Make A Deal! – Browser Game

- Built an interactive browser game using HTML, CSS, and Vanilla JavaScript, implementing game state management and event-driven user interaction
- Structured deterministic game logic separate from presentation, showcasing practical use of JavaScript event listeners to handle user decisions and game outcomes

Madlib – Simple Form Validator

- Implemented server-side form handling in PHP, validating and processing user input to dynamically generate content while reinforcing request-response fundamentals
- Designed a minimal web interface with HTML/CSS, focusing on user input flow, error prevention, and clean separation between presentation and logic

Skills

- **Languages:** HTML, CSS, Python, JavaScript, SQL
- **Databases:** SQlite3
- **Frameworks:** Flask
- **Tools:** Git, GitHub, Flask-SQLAlchemy

Education

Graduation: Expected Fall 2027

University of the Cumberlands: *B.S.* in Computer Science; Minor in IT (CGPA: 3.7)

Non-Technical Experience

May 2024 – May 2025

Sales Associate – Club Demonstration Services @*Costco*

- Collaborated with cross-functional team members to execute in-store product demonstrations in a high-traffic retail environment
- Communicated product value clearly to diverse customers, adapting messaging based on needs and objections
- Maintained coordination with supervisors and peers to ensure smooth setup, breakdown, and shift transitions
